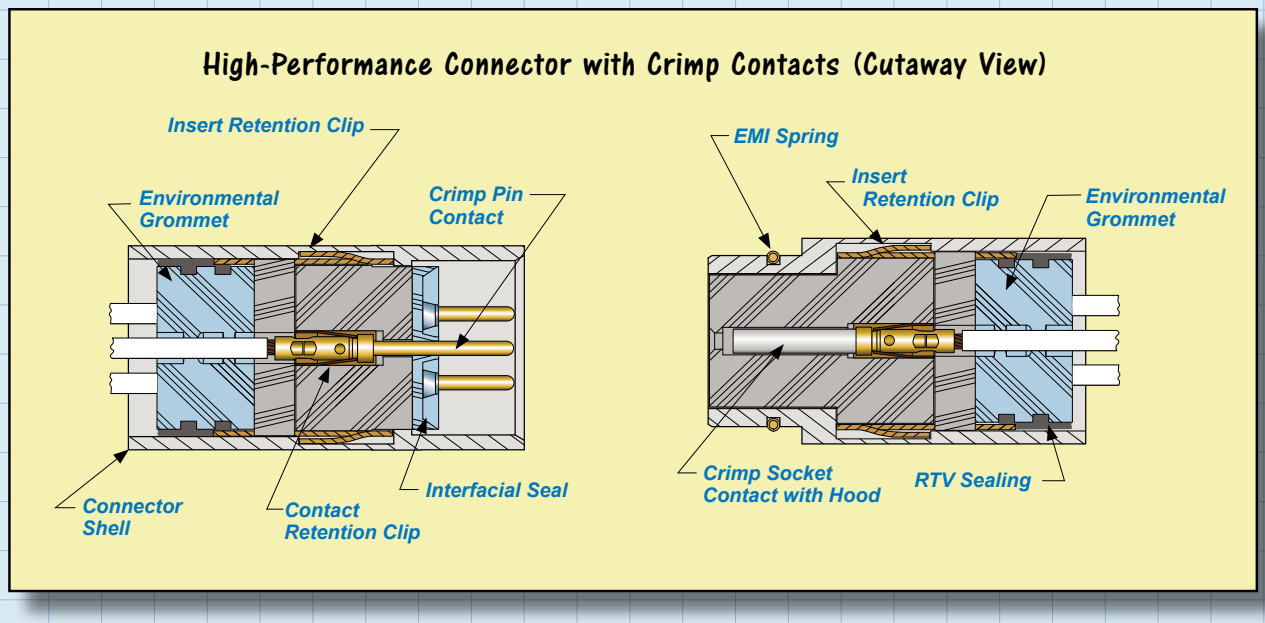
Introduction to Crimp Contacts
SAE-AS39029

Glenair brings a new perspective to the supply of high-performance Mil-Spec and commercial contacts: High Availability! Whether you need a standard duty socket for a MIL-DTL-28840 connector or an extended duty pin for MIL-DTL-38999 Series III, we have you covered with products that are always in stock—with no dollar or quantity minimums. In addition to the broadest selection and availability, Glenair also delivers outstanding interconnection compatibility. Glenair QPL SAE-AS39029 as well as our proprietary contact series are guaranteed to mate properly and perform at the upper limits of application requirements.

About SAE AS39029 Crimp Contacts

In a marketplace saturated with specialty interconnection media, the SAE-AS39029 crimp contact is still the "bread and butter" of the circular connector world. Serving platforms like the D38999, M28840 and countless others, AS39029 crimp contacts continue to offer reliable power and signal transmission in ruggedized applications. A myriad of sizes, termination options and materials mean that end users don't have to compromise performance or reliability.



Crimping results in a gas tight connection between the wire and its terminal. Although there are certainly alternatives to crimping, such as ultrasonic welding, resistance welding, insulation displacement technologies and so on, no other available technology delivers the short cycle times, flexibility and low overall cost of crimping—making it the termination technology of choice for most high-performance connector systems.

Crimp connectors are most commonly used to terminate stranded wire. Crimp-on terminals are attached by inserting the stripped end of the wire into the barrel end of the terminal, which is then mechanically deformed (crimped). Special crimp tools are a must, and are supplied with appropriate accessory attachments to ensure reliable terminations for every wire and contact combination. Military Specification MIL-DTL-22520 provides the aerospace/defense industry with a common set of rugged, reliable hand crimp tools. This specification controls the voltage drop and tensile strength of crimp terminations. Daniels Manufacturing Corporation is the leading manufacturer of these tools.

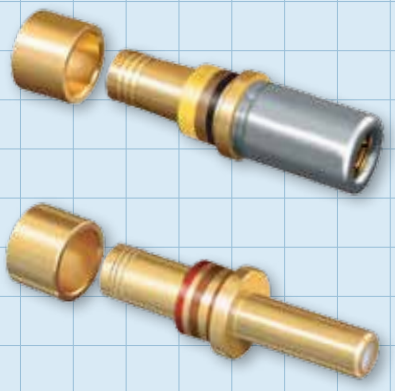
The AS39029 product series supplied by Glenair includes all the most popular standard and extended duty pin and socket contacts for use in high-performance circular and rectangular multi-pin connectors. We are also well positioned to supply special-purpose contacts to meet unique application requirements.

About High Performance Shielded Contacts

Glenair shielded contacts are fabricated from the best available materials and manufacturing processes. Conductive elements are gold-plated copper alloy. Dielectrics are high-performance fluorocarbon. When applicable, contacts are approved to SAE AS39029.

Shielded Coaxial Contacts

Shielded coaxial contacts have a special role in the interconnect system and are designed for use in a wide range military and aerospace connectors that service analog radio frequency or microwave applications. Most Glenair cylindrical connectors, including MIL-DTL-38999, can accomodate shielded coaxial contacts. Rectangular connector packages, such as our high-performance HiPer-D are also ideally suited for shielded high frequency contacts. Glenair coaxial contacts are specified according to size, cable choice and impedance. The contacts are easily incorporated into standard 8, 12 and 16 size contact cavities, enabling users to interchange high-frequency contacts into connector insert arrangements originally designed for power or signal contacts. Special 50 Ohm matched impedance contacts are also available. Various grades of coaxial cables can be supplied directly by Glenair, or other commercial suppliers.



Quadrax

A Quadrax contact is really a "connector within a connector." These unique high-speed contacts house four discrete size 24 pin or socket contacts within each keyed size 8 crimp body. Two sets of twisted pair wires terminate to the size 24 contacts, while the overall shield is grounded via the outer size 8 shell—affording 360° shielding. These high speed contacts have outstanding EMI compatibility for high data transfer digital applications where little or no power is needed. Standard crimping tools can be used to terminate all components, making shop or field assembly fast and simple.

Shielded Concentric Twinax

These contacts are designed for high-speed twisted pair applications that count on reliable shielding and contact durability. The concentric twinax cartridge is designed for easy crimp termination of twisted pair cable and shielding, and are designed specifically for use in MIL-DTL-38999 connectors. Unlike standard twinax designs, Glenair concentric twinax contacts deliver outstanding shield integrity from the conductor through the connector and do not require contact polarization within the insert. Glenair size #8 concentric twinax contacts feature a hooded socket and hardened plating for outstanding durability. Pin contacts are chamfered for easy and reliable mating. Termination is supported with easy to follow crimp instructions. Assembly tooling is available for these and all Glenair contacts.

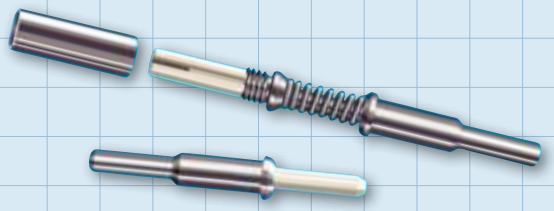
Introduction to Crimp Contacts
Fiber Optic Termini

About Fiber Optic Contacts

Today, the use of fiber optic systems to carry digitized video, voice and data is universal. High-performance fiber optic interconnect technologies, combined with satellite and other broadcast media, enable high-speed specialized applications in avionics, robotics, weapon systems, sensors, space and other high performance environments. Highly engineered fiber optic contacts, or termini, are the key to delivering low data loss and reliable, repeatable performance in fiber optic connection systems.

Fiber Optic Interconnect Termini

Fiber optic connectors are designed to be connected and disconnected many times without affecting the optical performance of the fiber circuit. Connectors can be thought of as transition devices which make it possible to divide fiber optic networks into interconnected subsystems and to facilitate the attachment of individual branches of the system to a transmitter, receiver or another fiber. The MIL-DTL-38999 connector is currently the most commonly specified multi-pin cylindrical interconnect in both fiber and copper conductor aerospace applications. When used to connect multiple strands of fiber simultaneously, the D38999 connector functions as a container or shell for the precision termini which perform the actual marriage of the fiber strands.



Over the past two decades there have been dramatic tolerance improvements in terminus design to ensure precise, repeatable, axial and angular alignment between pin and socket termini within the connector shell. Ferrule design, critical to the performance of the termini, has traditionally relied on a machined stainless steel ferrule incorporating a precision micro-drilled hole.

Glenair's fiber optic termini for D38999 Series III connectors are qualified to MIL-PRF-29504/4 and /5 requirements. Unique precision ceramic ferrules, with concentricity and diametric tolerances controlled within a micron (.00004 of an inch), meet the needs of high bandwidth and low allowable insertion loss applications. Glenair's ferrules are approximately 10 times more accurate than alternative designs, and have reduced insertion loss values from 1.5dB to less than .5dB. These products are ideally suited for aerospace applications.

Glenair has also manufactured and qualified fiber optic interconnection systems for other branches of the military, including those used in mission-critical ground, sea and space applications. Contact termini for these fiber optic systems incorporate many of the latest technologies, including integrated retention clips, IPC polish keying, environmental sealing and more. Our single and multichannel fiber optic termini utilize the latest materials technology and are designed for use with Glenair's family of fiber optic connectors as well as third party products. From MIL-DTL-38999 to MIL-DTL-28876, Glenair has a fiber optic terminus for virtually every high-performance fiber optic system in use today and we are on the design and standards committees creating fiber optic interconnect solutions for tomorrow's mission-critical applications.

Fiber Optic Costs and Benefits

When evaluating the costs and benefits of moving to fiber, it is important to adopt both a short and long term view. In the short term, it is arguably less expensive to simply continue using copper cabling to meet an incremental expansion of data communication needs. This avoids the expense of adding the transmitters, converters, repeaters, connectors, termini, receivers and so on needed for integrating optical fiber into an existing electronic system. Taking the long view, investing in the conversion to fiber optics often makes good sense, especially given the performance benefits—EMI immunity, security, weight reduction, bandwidth, etc.—as well as cost of ownership factors such as reduced cable maintenance costs and ease of installation.

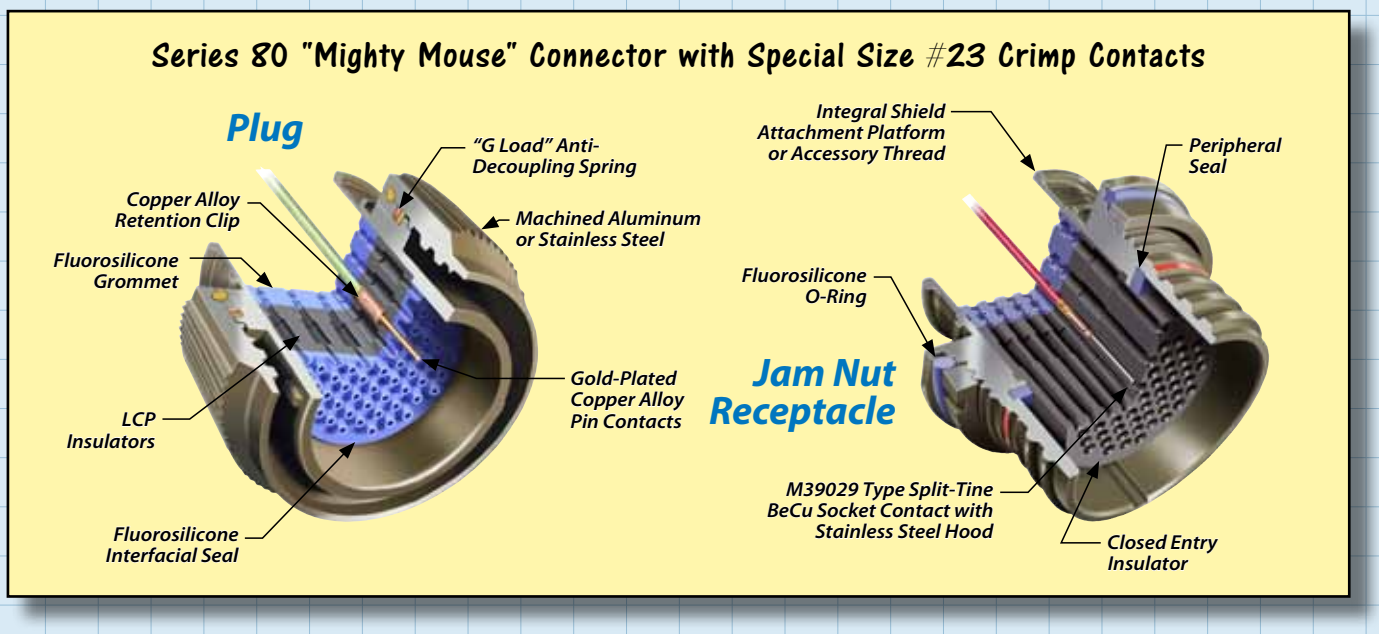
Introduction to Crimp Contacts
Series 80 Mighty Mouse

About Our Series 80 Mighty Mouse Size #23 Crimp Contacts

Like all high-performance crimp contact systems, Series 80 Mighty Mouse contacts are terminated to wire using precision crimp tools, and are then snapped into place by hand or with a hand held insertion tool. Damaged or miswired contacts may be removed from the connector using special extraction tools. Although the connectors are supplied with a full complement of contacts, extra contacts are commonly purchased as spares or to use for quality assurance purposes, such as crimp tensile tests. Coaxial contacts are also typically ordered separately, as customers prefer to specify the exact performance values for these specialized shielded contacts.

Mighty Mouse contacts conform to the requirements of Aerospace Standard AS39029. This SAE specification defines the design, dimensions and performance of contacts used in aerospace grade electrical connectors. The "general specification" covers a variety of contacts including thermocouple, hermetic, coaxial and triaxial types. The "slash sheets" contain dimensions and other information for specific types of contacts. Each contact is assigned a Basic Identification Number (BIN), a non-significant three digit code corresponding to the color code on the contacts. Series 80 Size #23 and size #20HD contacts conform to AS39029 requirements, but are not covered by a slash sheet. Size #20, #16 and size #12 contacts are standard AS39029 contacts.



About Thermocouple and Other Special Purpose Contacts

Glenair produces a wide range of special purpose contacts including high power and high ampacity contacts, pneumatic contacts, PC Tail contacts for board terminations and thermocouple contacts for use in temperature measuring applications. We also produce all the small accessory items, such as sealing plugs, that make us a convenient one-stop-shopping destination for users of high-performance Mil-Spec and commercial connectors and contacts.

We invite our customers to take advantage of the breadth and depth of our contact product line, especially in terms of its high-availability and our willingness to engineer unique and special-purpose contact solutions for virtually any interconnect challenge.

Connector and Contact Glossary of Useful Terms

Barrel - (Conductor Barrel) - The section of the terminal, splice or contact that accommodates the stripped conductor.

BIN (Basic Identification Number) - color bands on the crimp barrel of a contact to identify contact part number. Each BIN code corresponds to only one slash sheet, thus identifying the complete M39029/XX- part number.

Closed entry - A contact or contact cavity design in the insert or body of the connector which limits the size or position of the mating contact or printed circuit board to a predetermined dimension.

Coaxial contact - A contact having two conducting surfaces, a center contact and a coaxially placed sleeve

Contact - The conductive element in a connector that makes actual contact, for the purpose of transferring electrical energy.

Contact area - The area in contact between two conductors, two contacts, or a conductor and a contact permitting the flow of electricity.

Contact arrangement - The number, spacing and arrangement of contacts in a connector.

Contact resistance - Electrical resistance of a pair of engaged contacts. Resistance may be measured in ohms or millivolt drop at a specified current over the engaged contacts.

Contact retainer - A device either on the contact or in the insert to retain the contact in an insert or body.

Contact retention - The axial load in either direction which a contact can withstand without being dislodged from its normal position within an insert or body.

Contact size - An assigned number denoting the size of the contact engaging end.

Contact shoulder - The flanged portion of a contact which limits its travel into the insert.

Crimp - The physical compression (deformation) of a contact barrel around a conductor in order to make an electrical connection.

Crimp contact - A contact, pin or socket, whose back portion (wire barrel) is a hollow cylinder into which a stripped wire (conductor) is inserted. The sidewalls of the wire barrel are then mechanically compressed (uniformly deformed) using a crimping tool to captivate the conductor.

Crimping dies - Portion of the crimping tool that shapes the crimp.

Crimping tool - Mechanism used for crimping.

Depth of Crimp - The distance the indenter penetrates into the barrel.

Die Closure - The gap between indenter dies at full handle closure. Usually defined by Go/No-Go dimensions.

Indenter - That part of a crimping die, usually the moving part, which indents or compresses the contact barrel.

Inspection hole - A hole placed at the bottom end of a contact wire barrel to permit visual inspection to see that the conductor has been inserted to the proper depth in the barrel prior to crimping.

Installing tool - A device used to install contacts into a connector. A device used to install taper pins into taper pin receptacles.

Locator - Device for positioning terminals, splices, or contacts into crimping dies, positioner, or turret heads.

Milivolt drop test - A test designed to determine the voltage loss due to resistance of a crimped joint.

Pin contact - A contact having an engagement end that enters the socket contact.

Connector and Contact Glossary of Useful Terms

Plating - The overlaying of a thin coating of metal on metallic components to improve conductivity, provide for easy soldering or prevent rusting or corrosion.

Positioner - A device when attached to a crimping tool locates the contact in the correct position.

Power contact - Type of contact used in multi-contact connectors to support the flow of rated current.

Pull-out force - Force necessary to separate a conductor from a contact or terminal, or a contact from a connector, by exerting a tensile pull.

Radio frequency contact (RF contact) - An impedance matched shielded contact.

Range, wire - The sizes of conductors accommodated by a particular barrel. Also the diameters of wires accommodated by a sealing grommet.

Removal tool - A device used to remove a contact from a connector. A device used to remove a taper pin from a taper pin receptacle.

Sealing plug - A plug which is inserted to fill an unoccupied contact aperture in a connector insert. Its function is to seal all unoccupied apertures in the insert, especially in environmental connectors.

Shielded contact - A contact which carries alternating current and is shielded from unwanted signals (RFI and EMI).

Socket contact - A contact having an engagement end that will accept entry of a pin contact.

Solderless connection - The joining of two metals by pressure means without the use of solder, braze, or any method requiring heat.

Strip - To remove insulation from a conductor. (See details elsewhere in technical section of this cat.)

Thermocouple contact - Contact of special material used in connectors employed in thermocouple applications. Material often used are iron, constantan, copper, chromel, alumel and others.

Turret Head - A device that contains more than one locator which can be indexed by rotating a circular barrel, and when attached to a crimping tool, positions the contact.

CONTACT MATERIALS AND SPECIFICATIONS

Component	Material	Notes
Pin Contact	Beryllium copper alloy per ASTM B197, 50 microinches gold plated per ASTM B488 Type II Code C Class 1,27 over nickel plate per QQ-N-290 Class 2, 30-150 microinches	Approved for Space Flight
Socket Contact	Beryllium copper alloy per ASTM B197, 50 microinches gold plated per ASTM B488 Type II Code C Class 1,27 over nickel plate per QQ-N-290 Class 2, 30-150 microinches.	Approved for Space Flight
Socket Contact Hood	Stainless steel, passivated per AMS-QQ-P-35	Approved for Space Flight

Contact Performance Specifications

Test	Performance Specifications
Durability	*(meets SAE-AS39029, paragraph 3.5.9)* No electrical or mechanical defects after 500 cycles of engagement and disengagement
Contact Retention	*(meets MIL-DTL-38999, paragraph 3.23)* The axial displacement of the contact shall not exceed .012 inch (0.30 mm). No damage to contacts or inserts shall result.
Pin Engagement End	*(meets SAE-AS39029 paragraph 3.4.1)* Unless otherwise specified, the mating end of all contacts (except size 22 and smaller) shall be formed with an approximate spherical radius.
Permeability	*(meets SAE-AS39029, paragraph 3.5.1)* When tested as specified in paragraph 4.7.2, the relative magnetic permeability of the contact shall be no greater than 2.0.
Vibration	*(meets SAE-AS39029, paragraph 3.5.10)* When contacts are tested as specified in paragraph 4.7.11, there shall be no electrical discontinuity of 1 microsecond or greater. There shall be no defects detrimental to the mechanical or electrical performance.
Salt Spray (corrosion)	*(meets SAE-AS39029, paragraph 3.5.12)* When tested as specified in 4.7.13, mated contacts shall withstand 48 hours of salt spray conditioning without defects detrimental to the mechanical or electrical performance.
Temperature life	*(meets SAE-AS39029, paragraph 3.5.13)* When tested as specified in paragraph 4.7.14, mated contacts shall withstand temperature conditioning for 1,000 hours without defects detrimental to mechanical or electrical performance. There shall be no diffusion/migration of the base metal through the contact outer plating.Class A - Maximum operating temperature +125°C. per paragraph 1.2.2
Dielectric withstanding voltage	*(meets SAE-AS39029, paragraph 3.5.19)* When tested as specified in paragraph 4.7.20, crimped contacts shall show no evidence of breakdown or flashover.
Workmanship	*(meets SAE-AS39029, paragraph 3.7)* Contacts shall be processed in such a manner as to be uniform in quality and shall be free from foreign material and burrs or sharp corners that might damage the connector or affect mating of the contacts. Burrs and sharp edges shall be removed 0.005 inch maximum.

SERIES 257-606

QUADRAX

Glenair MIL-DTL-38999 Series III Type Quadrax Connectors

Glenair doesn't just make a complete range of high-frequency shielded contacts. We also make the connector packaging too—from Quadrax equipped circular connectors to Coax-equipped ARINCs, D-Subminiatures and our own Series 79 Micro-Crimp. As we like to say, we produce the complete solution—soup to nuts. And because we have decades of experience with all classes of high performance connectors, we're well positioned to design and manufacture a truly complete interconnect solution, including wire and cable, contacts, connectors, shielding, backshells, dust caps, shrink boots, you name it. Simply put, nobody else in the interconnect industry can offer such a comprehensive solution. Sure, we're happy to just be your contact supplier. But if you like our high-availability approach to that business (ample manufacturing capacity, same-day shipment inventory and the best and most available technical support team in the industry) we're thinking you'll love the service and support we bring to all our product lines. So give us a try. We promise you'll appreciate the extra value of working with a supplier that truly understands what availability is all about.

Glenair®

1211 Air Way • Glendale, CA 91201-2497 • Tel: 818-247-6000 • Fax: 818-500-9912 • E-Mail: sales@glenair.com

Shielded Contacts

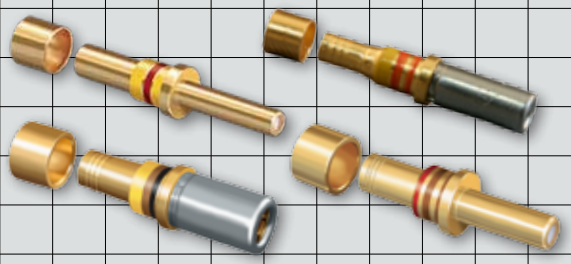
High Performance: Coax, Twinax and Quadrax

From Coax...

Shielded coaxial contacts have a special role in the interconnect system and are designed for use in a wide range of military and aerospace connectors that service analog radio frequency or microwave applications. Most Glenair cylindrical connectors, including our D38999 type, can accommodate shielded contacts. Rectangular connector packages, such as our high-performance HiPer-D are also ideally suited for these shielded contacts.

...to Twinax and Quadrax

High-speed differential impedance contacts, such as those used in advanced digital communications applications, are another key specialty at Glenair. Our Twinax and Quadrax contacts are exactingly engineered and manufactured using the best available materials and manufacturing processes. Conductive elements are gold-plated copper alloy. Dielectrics are high-performance fluorocarbon. When applicable, our shielded contacts are approved to SAE AS39029.



- **Qualified to SAE-AS39029 on Dozens of Contacts—and Growing!**
- **Same Day Inventory on Popular and Hard-to-Find Styles**
- **Highest Quality Materials Including Enhanced Durability Plating**
- **Fully Intermatable with Equivalent AS39029 Contacts**

D38999 Series II

Size #12 Coaxial Socket Contacts for MIL-DTL-38999 Series II Connectors

These #12 contacts accept 50 ohm and 75 ohm coaxial cable. Inner contact is rated at 1 amp, the outer contact 12 amps. DWV rating is 1000 Vac rms sea level, 250 Vac at 50,000 feet. Contacts are packaged individually and shipped unassembled with instruction sheet. One contact consists of outer contact , fluorocarbon dielectric, inner contact and shield crimp sleeve. Inner and outer contacts are gold-plated copper alloy. Approved to SAE AS39029. 5000 megohm insulation resistance.

Size 12 Coaxial Pin

D38999 Ser. I, II, III, IV

Size #12 Coaxial Pin Contacts for MIL-DTL-38999 Series I, II, III and IV Connectors

These #12 pin contacts accept 50 ohm and 75 ohm coaxial cable. Inner contact is rated at 1 amp, the outer contact 12 amps. DWV rating is 1000 Vac rms sea level, 250 Vac at 50,000 feet. Contacts are packaged individually and shipped unassembled with instruction sheet. One contact consists of outer contact , fluorocarbon dielectric, inner contact and shield crimp sleeve. Inner and outer contacts are gold-plated copper alloy. Approved to SAE AS39029. 5000 megohm insulation resistance. Mates with: M39029/75.

These contacts offer improved frequency response compared to standard coaxial contacts. VSWR is 1.32:1 at 3GHz . Nominal impedance is 50 ohms. Insertion loss at 3GHz is 0.20 dB maximum. Inner contact is rated at 1 amp, the outer contact 12 amps. DWV voltage rating is 1000 Vac rms sea level, 250 Vac at 50,000 feet. Contacts are packaged individually and shipped unassembled with instruction sheet. Inner and outer contacts are gold-plated copper alloy. 5000 megohm insulation resistance.

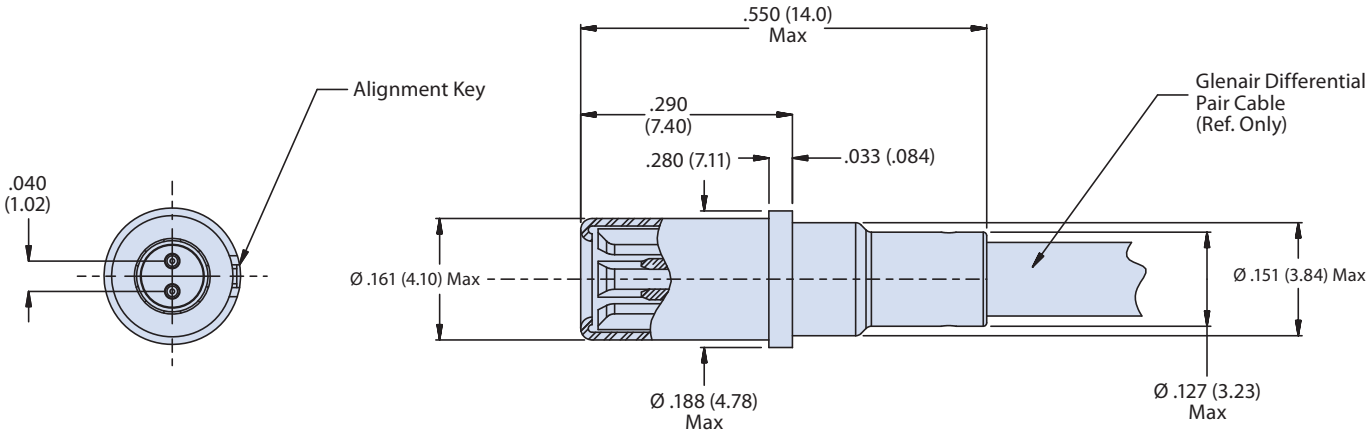
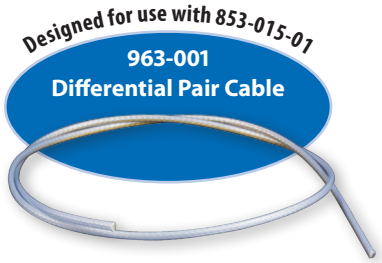
Socket	853-015-01	N/A	28	859-041 963-001	100-Ohms Nominal	DC to 10 GHz	1.1 + (.03 * F GHz)	1.3 *F GHz





Material and Finish
Contact Body: Copper Alloy/Gold Plated
Center Contact: Copper Alloy/Gold Plated
Crimp Sleeve: Brass or equivalent/Gold Plated

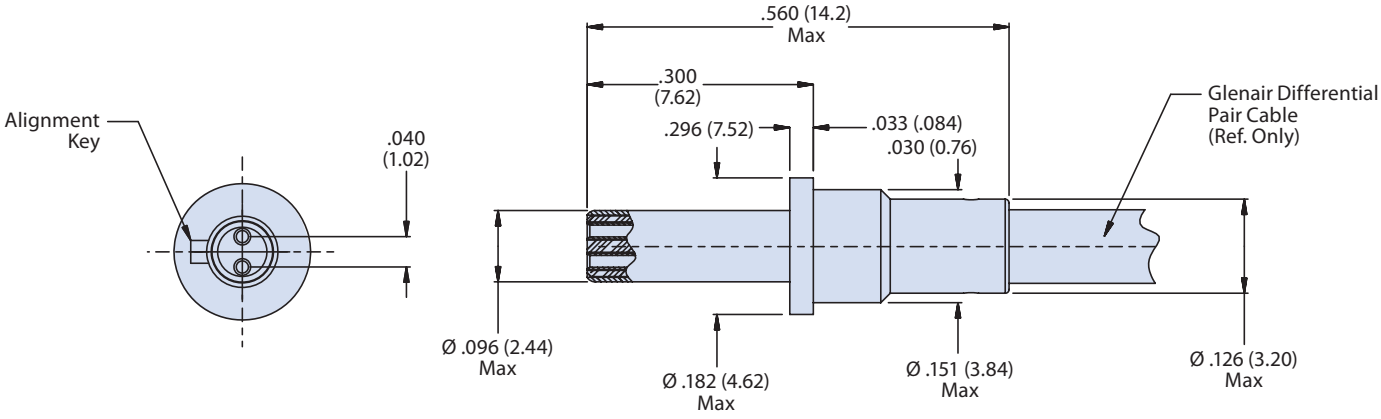
Electrical Parameters
Differential Impedence: 100-ohms nominal
Frequency Range: DC to 10 Ghz
VSWR: 1.1+(.03* F GHz)
Insertion Loss: 1/3* F GHz
Dielectric Withstanding Voltage: 500 Vrms
Insulation Resistence: 5000 Megohms minimum

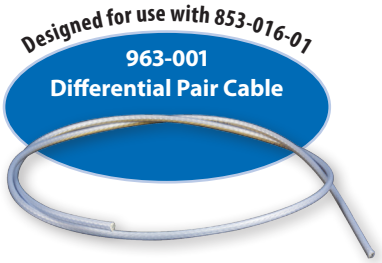
Notes
Contact is designed to accommodate Glenair P/N 963-001 cable.
For assembly instructions, see AI85014.
Socket contact shall mate with Glenair Pin Contact P/N 853-016-XX.
For use in Glenair Mighty Mouse and Series 79 Micro-Crimp connectors only.
PCB Tail-equipped contacts also available. Consult factory.

Size #12 Differential Twinax Pin Contact for Multi-Gigabit Data Rate Applications

These solder terminated #12 twinax pin contacts accept 100 ohm twinax cable. Current rating is 1 Amp. DWV rating is 500 Vac rms sea level, 125 Vac at 70,000 feet. Contacts are packaged individually and shipped unassembled with instruction sheet. One contact consists of outer contact, center contact and crimp sleeve. All contacts are gold-plated copper alloy. 5000 megohm insulation resistance at 200Vdc. Mates with: 853-015. Ideally suited for multi-gigabit data rate applications such as 1000 Base-T gigabit ethernet.

Type	Glenair Part No.	Military Part No.	AWG Wire Size	Cable Accommodation	Impedence	Frequency Range	VSWR	Insertion Loss
Pin	853-016-01	N/A	28	859-041 963-001	100-Ohms Nominal	DC to 10 GHz	1.1 + (.03 * F GHz)	1.3 *F GHz





Material and Finish

Contact Body: Copper Alloy/Gold Plated
Center Contact: Copper Alloy/Gold Plated
Crimp Sleeve: Brass or equivalent/Gold Plated

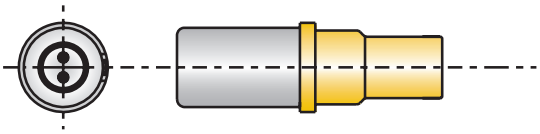
Electrical Parameters

Differential Impedence: 100-ohms nominal
Frequency Range: DC to 10 Ghz
VSWR: 1.1+(.03* F Ghz)
Insertion Loss: 1/3* F Ghz
Dielectric Withstanding Voltage: 500 Vrms
Insulation Resistence: 5000 Megohms minimum

Notes

Contact is designed to accommodate Glenair P/N 963-001 cable.
For assembly instructions, see AI85014.
Pin contact shall mate with Glenair Socket Contact P/N 853-015-XX.
For use in Glenair Mighty Mouse and Series 79 Micro-Crimp connectors only.
PCB Tail-equipped contacts also available. Consult factory.

AI85014
Twinax Socket Contact
Assembly Instructions

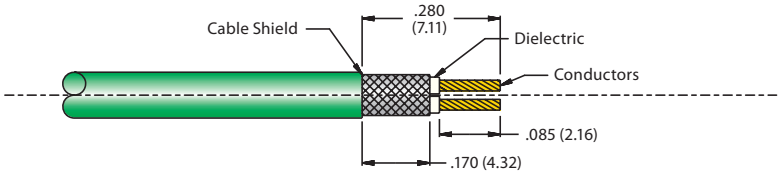


Socket Contact

100 Ohm Parallel Cable

STEP 1

1. Strip cable to dimensions shown. ***Be careful not to flare braid open***.
2. Pre-tin conductor and braid shield.
3. Clean the solder joint with alcohol.

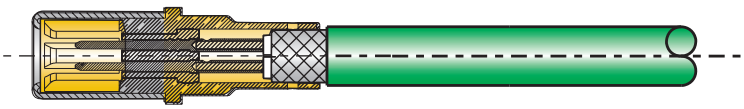


STEP 2

1. Insert cable into socket contact. ***Make sure center conductor lines up to the center socket.***

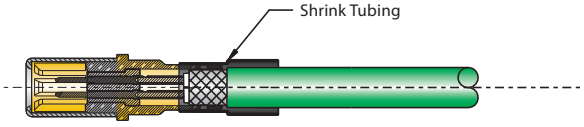
STEP 3

1. Install center conductors until they bottom-out in the contact cavity. ***Inspect to ensure cable shield is visible through the inspection hole***.
2. Apply flux and solder through the inspection hole; remove residues and contamination with alcohol after soldering.



STEP 4

1. Install M23053/5-204 or M23053/6-204 shrink tubing; cover solder area and extend insulation by minimum of one wire diameter.



STEP 5

1. Illustrates final assembly.

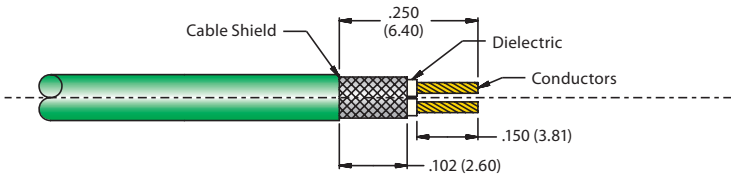
Pin Contact

100 Ohm Parallel Cable

STEP 1

1. Strip cable to dimensions shown. ***Be careful not to flare braid open***.
2. Pre-tin conductor and braid shield.
3. Clean the solder joint with alcohol.

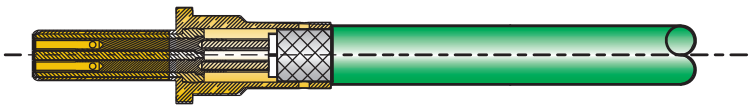


STEP 2

1. Insert cable into pin contact. ***Make sure center conductor lines up to the center pin.***

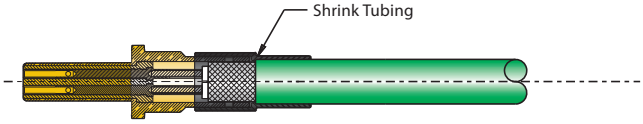
STEP 3

1. Install center conductors until they bottom-out in the contact cavity. ***Inspect to ensure cable shield is visible through the inspection hole***.
2. Apply flux and solder through the inspection hole; remove residues and contamination with alcohol after soldering.



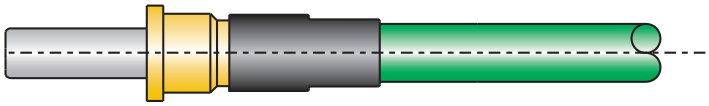
STEP 4

1. Install M23053/5-204 or M23053/6-204 shrink tubing; cover solder area and extend insulation by minimum of one wire diameter.



STEP 5

1. Illustrates final assembly.



SERIES 18

FIBER OPTICS

Mission-Critical Interconnect Systems for Commercial and Military Applications

From our MIL-PRF-28876 type fiber optic connectors to our MIL-DTL-38999 type solutions, Glenair produces advanced performance fiber optic interconnection systems for every military and commercial standard. Fiber optic connectors, termini and cabling offer reduced weight, reduced size, huge bandwidth and EMI immunity— and Glenair manufactures a solution for every branch of the military and every mission-critical commercial application. For complete order information please see our fiber optic catalog or visit our website at www.glenair.com

Glenair®

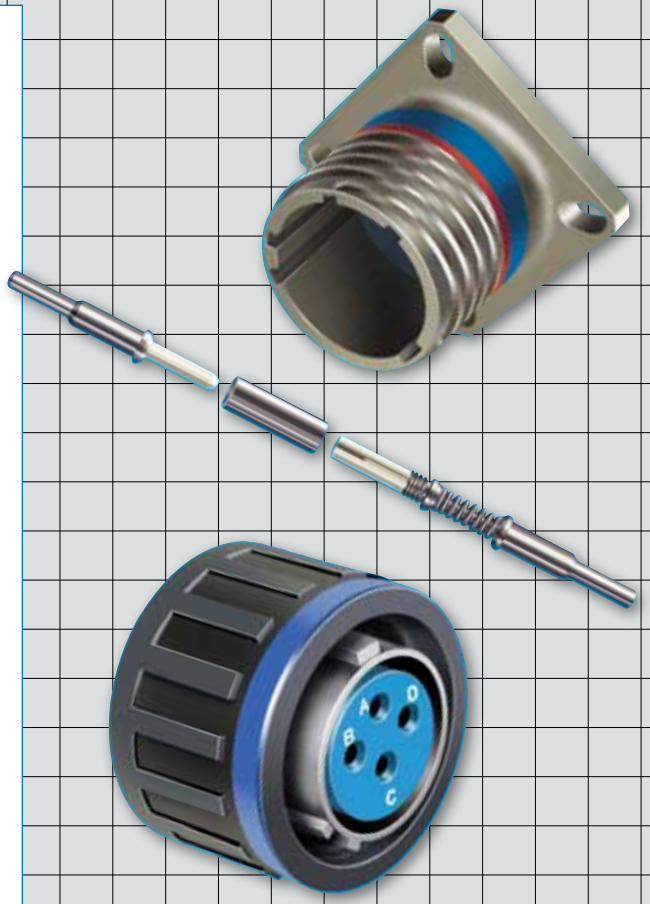
1211 Air Way • Glendale, CA 91201-2497 • Tel: 818-247-6000 • Fax: 818-500-9912 • E-Mail: sales@glenair.com

QPL and Commercial
High Performance Fiber Optic Termini

Industry Leading Fiber Optic Technology

Glenair Fiber Optic connection systems are well known throughout the aerospace and tactical military applications arena. Our fiber optic contacts are universally recognized to provide consistent performance with extremely low dB loss. We are the supplier of choice for some of the world's most advanced fiber optic systems, including the revolutionary F-35 Joint Strike Fighter.

Glenair offers the industry's widest range of contacts for both Mil-Spec and proprietary fiber optic connection systems. These highly-available contact termini are guaranteed to deliver outstanding interconnection compatibility. Glenair manufactures fiber optic termini for every popular Mil-Spec and commercial high-performance interconnection system, including the multi-channel MIL-DTL-38999 Series III. Our fiber optic termini deliver optimal performance in both our own connectors as well as those produced by other manufacturers. In fact, our MIL-PRF-29504 qualified fiber optic termini are often selected as much for their outstanding interconnection compatibility as for their ability to boost the optical performance of third party connectors.



- Qualified and Commercial High-Performance, Low dB Loss Termini
- Same Day Inventory for Hundreds of Part Numbers
- Broadest Range of Mission-Critical Termini in the Mil-Aero Industry
- Myriad Material and Design Advantages

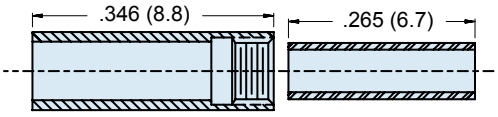
Size 16 MIL-DTL-38999 Type Fiber Optic Socket Terminus

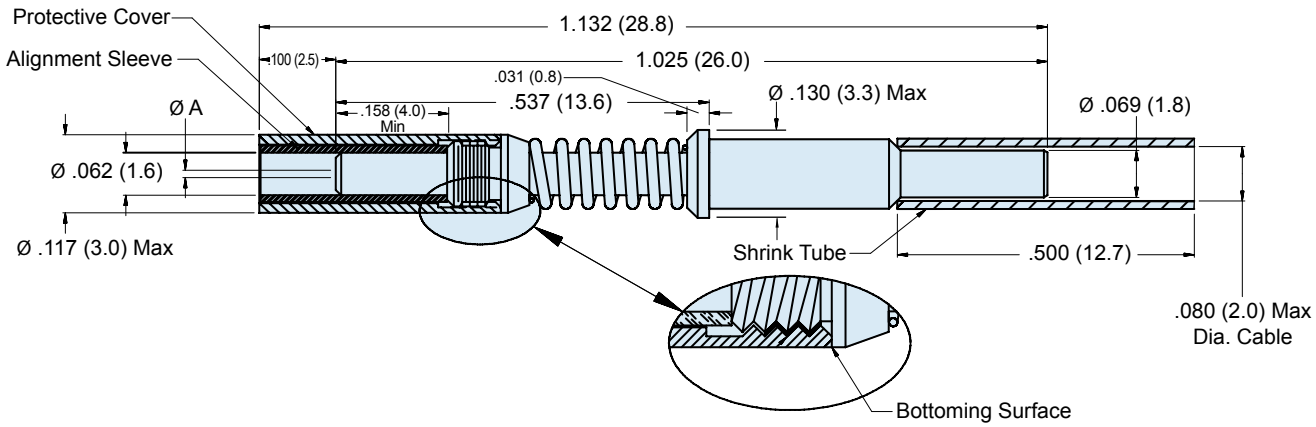
D38999 Series III

Ultra low dB loss QPL'd Socket Terminus for MIL-DTL-38999

Glenair's unique alignment techniques maximize optical performance and provide reliable, repeatable interconnection of optical fibers. Ferrule design, critical to the performance of the termini, has traditionally relied on a machined stainless steel ferrule incorporating a precision micro drilled hole. Glenair's unique precision ceramic ferrules, with concentricity and diametric tolerances controlled within a micron (.00004 of an inch) meet the needs of high bandwidth and low allowable insertion loss applications. In fact, Glenair's ferrules are approximately 10 times more accurate than alternative designs, and have reduced insertion loss values from 1.5dB to less than .5dB (typical loss for Glenair termini is .3 dB).



Protective Cover Alignment Sleeve (Included with Terminus)



Material and Finish

Ferrule: Zirconia Ceramic
Alignment Sleeve: Zirconia Ceramic or Stainless Steel/Passivate.
Terminus Assembly: Stainless Steel/Passivate
Spacer, Spring, and Cover: Stainless Steel/Passivate
Shrink Tube: Kynar

Accessories

Alignment Sleeve & Protective Cover can also be ordered separately (Table II).

Assembly

See assembly procedure GAP-015 for complete termination instructions.

M28876

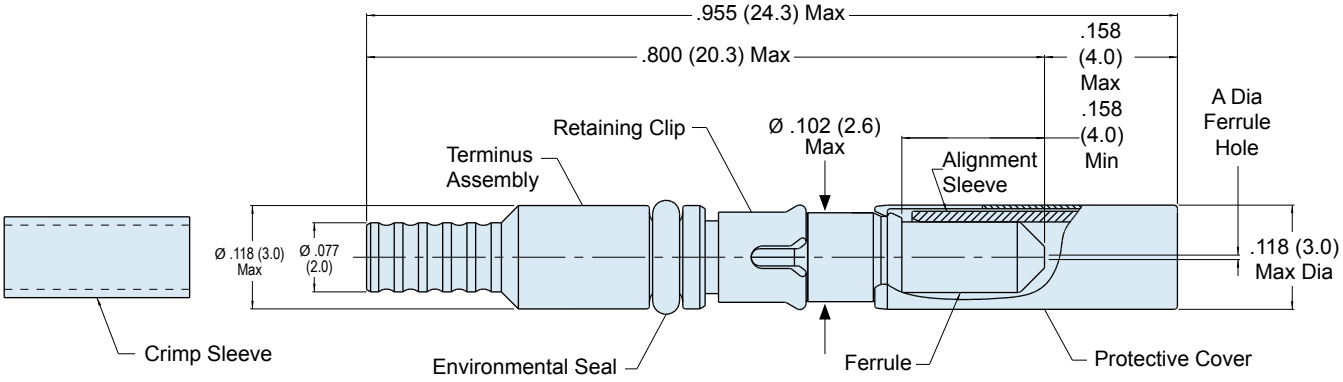
Size 16 M29504/15 Fiber Optic Socket Terminus for MIL-PRF-28876 Connectors

The use of fiber optics in shipboard and ship-to-shore data transmissions is growing rapidly, and the tight-tolerance MIL-PRF-28876 interconnect has become the universal standard for Navy shipboard applications. Glenair's qualified offering—including QPL'd MIL-PRF-29504/14 and /15 contacts—delivers all the necessary performance from precise optical alignment, to environmental protection, corrosion resistance and weight reduction. The Glenair MIL-PRF-28876 terminus is specifically geared for upgrade and retrofit applications where extending system life-cycles and reducing cost of ownership are principle requirements.



Material and Finish

Alignment Sleeve, Ferrule: Zirconia Ceramic
Protective cover: Spring Alloy / Nickel
Terminus Assembly: Stainless Steel / Passivate
Retaining Clip: Spring Alloy
Seal: Fluorosilicone
Crimp Sleeve: Brass Alloy / Nickel

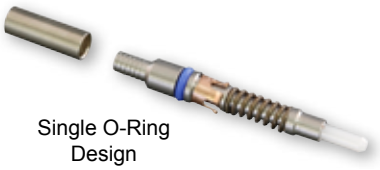
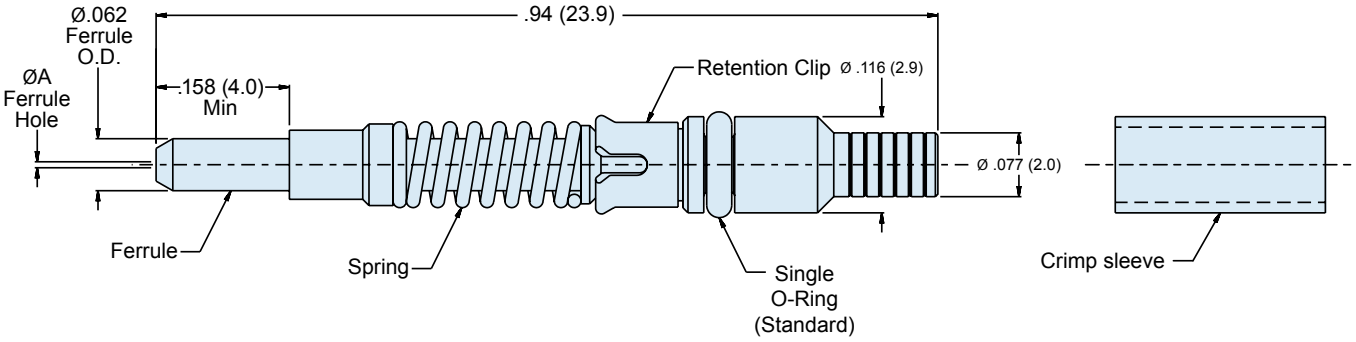
Size 16 COTS Front Release Fiber Optic Pin Terminus



Single O-Ring Design (Standard)

Dual O-Ring Design

The unique design of the Glenair 181-011 and 181-012 series fiber optic contact allows for rapid integration of optical media in a broad range of cylindrical and rectangular connector packages and systems. By placing the retention and environmental sealing components directly on the termini, Glenair is able to fabricate unique fiber optic connector shell packages without costly tooling and engineering. The secret is the integrated retention clip and environmental O-ring located directly on the contact. Glenair's in-house expertise and capacity for machining connector shells to the precise tolerances required in optical connection systems is the other half of the story. Finished connector systems perform at insertion-loss levels equivalent to other high-performance, tactical fiber optic systems such as MIL-DTL-38999 and MIL-PRF-28876.



Material and Finish

Ferrule: Zirconia Ceramic

Terminus Assembly: Stainless Steel/Passivate
Spring: Stainless Steel/Passivate
Retention Clip: Spring Alloy
O-Ring: Fluorosilicone
Crimp Sleeve: Brass Alloy/Nickel

Tools and Accessories/Assembly Notes

Crimp sleeve supplied with assembly. Spares may be ordered separately (see Table II).
See Glenair GAP-031 and GAP-031B for complete assembly instructions.
See 181-051 for dummy terminus.

Specifications

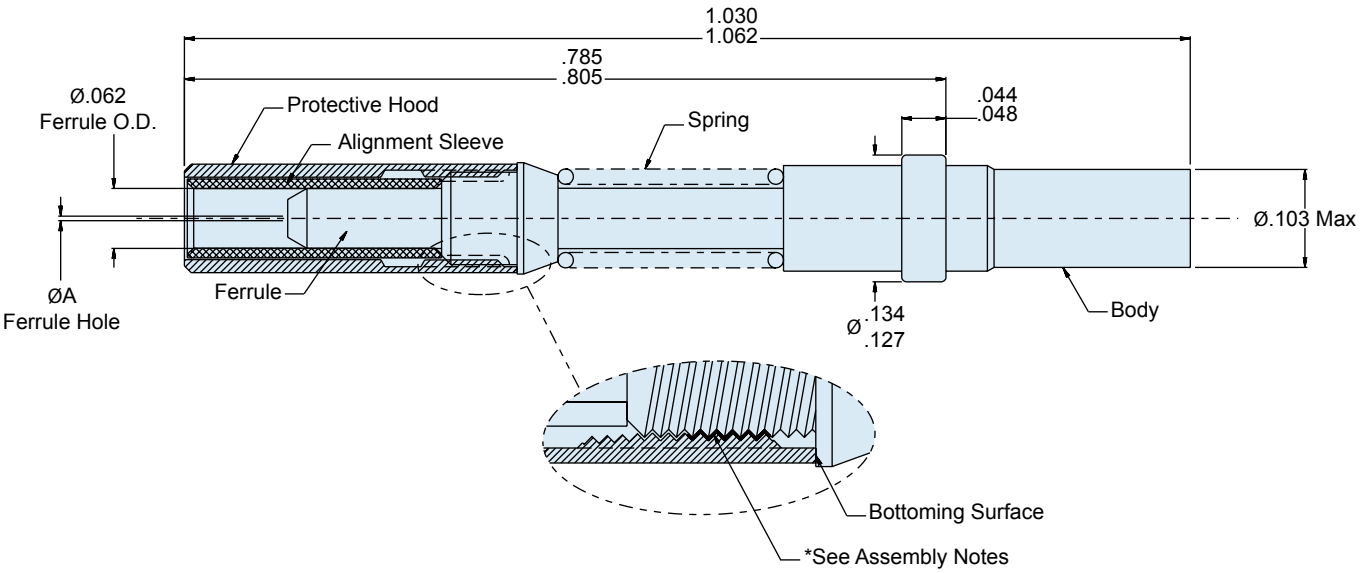
Terminus is also designed for use with Glenair 187-100 Combo D-Sub Receptacle connector.

187-080
Size 16 M29504/7 Type Socket Terminus
For ARINC 600 and 404 Connectors

Size 16 Fiber Optic M29504/7 Type Socket Terminus

The precision design of the Glenair 187-080 and 187-079 series fiber optic contacts for ARINC type connectors enables reliable and repeatable integration of optical media into industry-standard ARINC connector systems. The Glenair M29504/7 Type socket terminus and M29504/6 Type pin terminus provide low dB loss performance. The precision ceramic ferrule and alignment sleeve ensure precise optical alignment of fiber media. Available for singlemode and multimode glass fiber as well as 155.0 and 172.0 micron polyimide media.



Material and Finish

Ferrule, Alignment Sleeve: Zirconia Ceramic
Body, Spring and Protective Hood: Stainless Steel/Passivate

Tools and Accessories/Assembly Notes

Alignment Sleeve and Protective Cover can also be ordered separately (Table II)
*Threaded Protective cover must be retained using Threadlocker "Loctite 222" prior to insertion and fully seated against terminus body as shown.

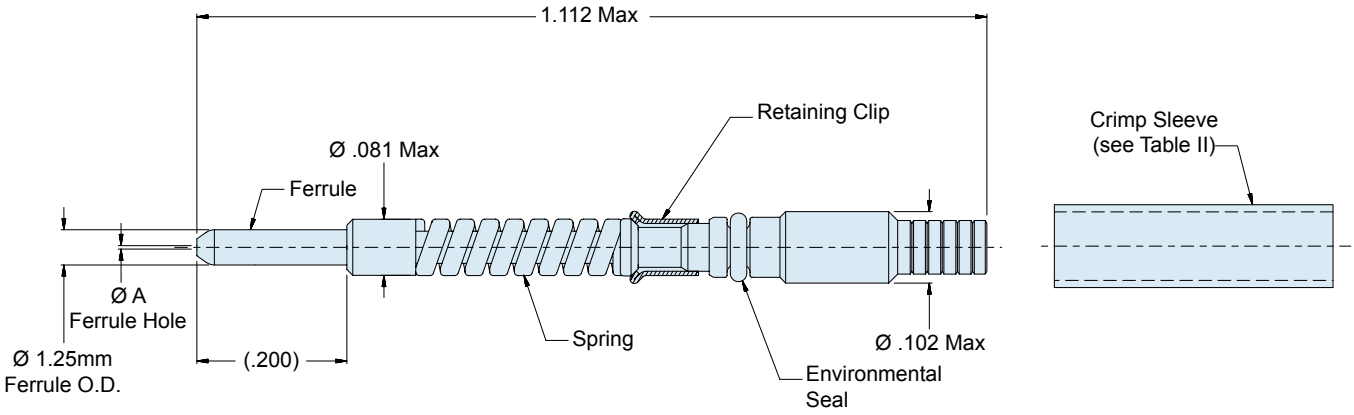
GHD • Glenair High Density
Fiber Optic Genderless Terminus
Size 18 Non-Keyed Terminus

Glenair High Density

Size 18 Non-Keyed Front Release Glenair High Density (GHD) Genderless Terminus

The Glenair High Density Fiber Optic Connector System is designed for applications that require reduced size and weight as well as outstanding optical and environmental performance. The System offers insertion loss values less than .5dB (typical loss for Glenair termini is .3 dB). Dense cavity spacing is acheived with an innovative front release terminus design and accomodation for M85045/16 cable. The genderless 18 gauge GHD contact delivers nearly double the density of M28876 and D38999 with superior optical performance.



Material and Finish

Ferrule: Zirconia Ceramic
Terminus Assembly: Stainless Steel/Passivate
Retaining Clip: Spring Alloy
Spring: Stainless Steel/Passivate
Seal: Fluorosilicone
Crimp Sleeve: Brass Alloy/Nickel

Tools and Accessories/Assembly Notes

Crimp Sleeve is supplied with Terminus Assembly, and may be ordered separately (see Table II).
For terminus less crimp sleeve, omit **C** from end of part number (e.g. ***181-056-1260***)

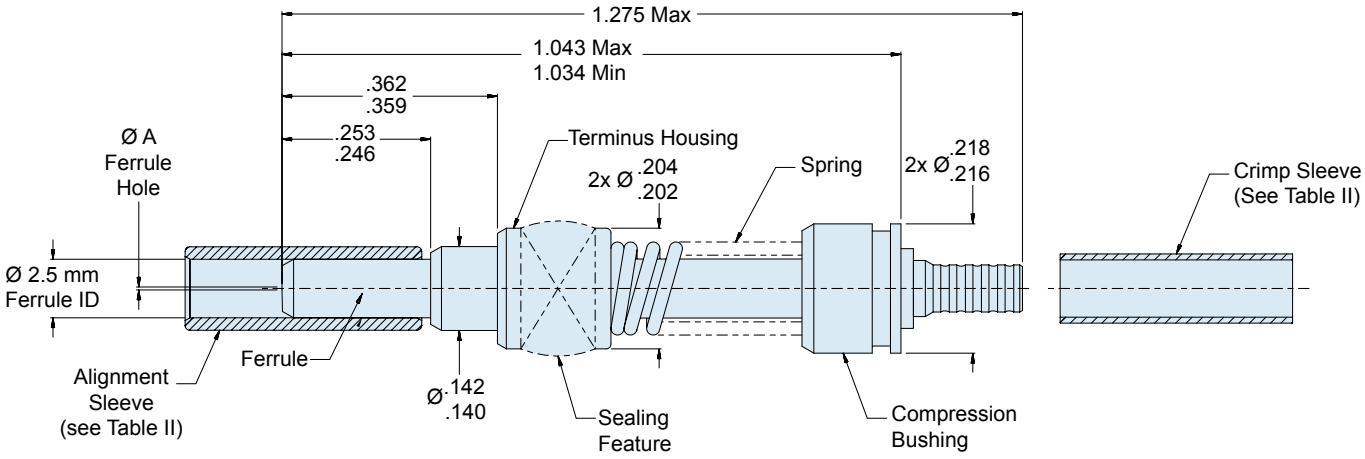
M29504/16 Type
Genderless GFOCA Fiber Optic Terminus

GFOCA

M29504/16 Type Genderless GFOCA Fiber Optic Terminus

Most commonly used by the army for long-run battlefield communications, the GFOCA Connection System is also well suited to dockside naval communications, down-hole drilling and other harsh environment applications. The hermaphroditic system utilizes low insertion loss butt-joint termini and a ruggedized coupling mechanism for reliable, repeatable mating. The genderless mating system is rated to 1000-2000 cycles depending on fiber media selection.



Material and Finish

Ferrule: Ceramic
Terminus Housing: Stainless Steel/Passivate
Spring: Stainless Steel/Passivate

Glenair®

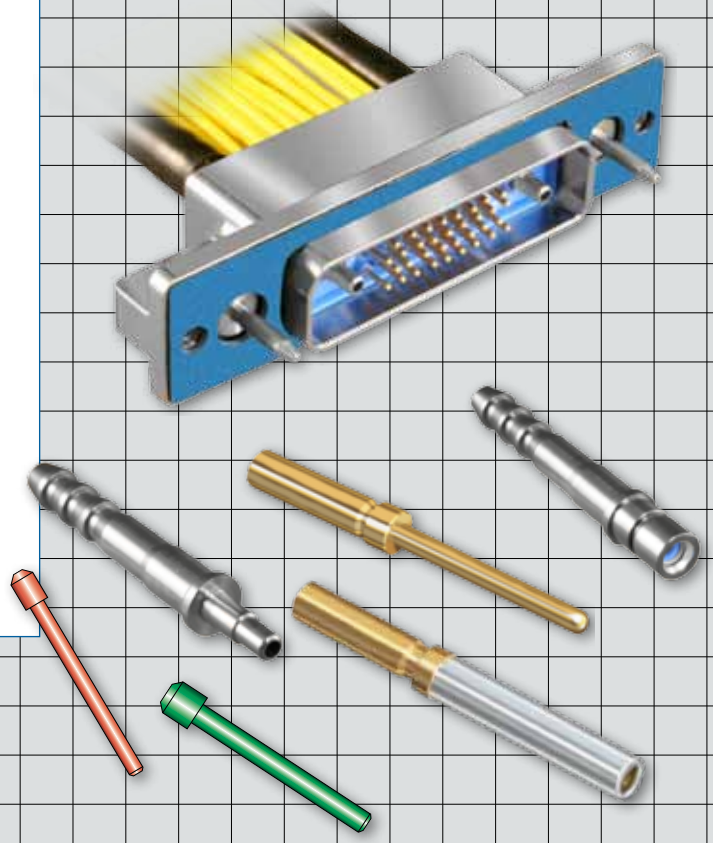
Special Purpose

High Performance Contacts: Thermocouple, Pneumatic, PC Tail, High Power, Solder Cup and More

A Solution for Every Challenge

Glenair produces a wide range of special purpose contacts including high power and high ampacity contacts, pneumatic contacts, PC Tail contacts for board terminations and thermocouple contacts for use in temperature measuring applications. We also produce all the small accessory items, such as sealing plugs, that make us a convenient one-stop-shopping destination for users of high-performance Mil-Spec and commercial connectors and contacts.

We invite our customers to take advantage of the breadth and depth of our contact product line, especially its high-availability and our willingness to engineer unique and special-purpose contact solutions for virtually any interconnect challenge.



- SAE-AS39029 QPL'd and Commercial Contacts
- Same Day Inventory on Popular and Hard-to-Find Styles
- Highest Quality Materials Including Enhanced Durability Plating
- Unique and Hard-to-Find Contacts

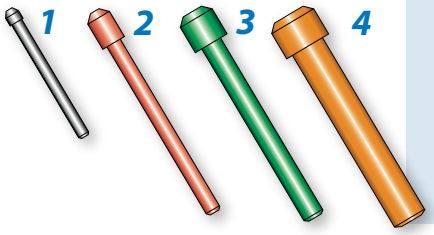
Grommet Sealing Plugs



Grommet sealing plugs are used to seal unwired contact cavities. The size #23 sealing plug is specially designed to fit Glenair Series 80 Mighty Mouse grommets. Sizes 20 through 0 plugs conform to MS27488 requirements. After installing unwired contacts into unused cavities, insert knob end of sealing plug into grommet until it bottoms against the unwired contact per illustration. Install sealing plugs with standard contact insertion/extraction tools . Size #23 plug is polyphenylsulphone, other sizes are per MS27488 requirements.

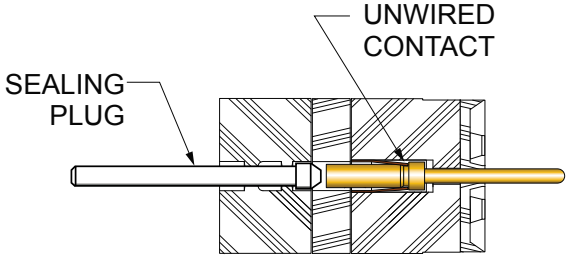
Installation of Sealing Plugs

"When installing sealing plug in connector cavities without contacts, the end opposite the knob shall be inserted first and the knob shall be seated against the grommet face. When installing into cavities with contacts, the sealing plugs shall be installed knob end first and shall bottom on the contact wire barrel."
(NAVAIR 01-1A-505–1 Installation manual)

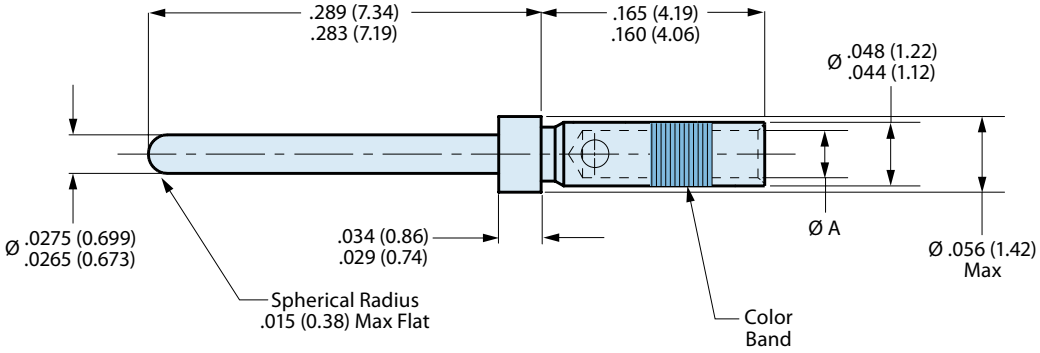


809-001
#23 Electrical Pin Contact
For Series 79 Micro-Crimp and Series 80 Mighty Mouse

Size #23 Crimp Pin Contact for Micro-Crimp and Mighty Mouse Connectors

Contact Type	Wire Size	Material	Part Number	Ø A In.	Ø A mm.	Color Band
Pin	#22 – #28	BeCu	809-001	.0335-.0355	0.851-0.902	None
Pin	#26 – #30	BeCu	809-042	.0229-.0245	0.582-0.622	Blue
Pin	#22 – #28	Alumel	809-065A	.0335-.0355	0.851-0.902	None
Pin	#22 – #28	Chromel	809-065C	.0335-.0355	0.851-0.902	None

Standard size #23 contacts accept #22 to #28 AWG wire. Choose "small bore" versions for #26 to #30 AWG wire. For thermocouple applications, specify alumel or chromel contacts. Contacts are bulk packaged. Terminate with standard M22520 crimper with special positioner.



D

CRIMP TENSILE STRENGTH		
Values are in pounds and are minimums.		
Wire Gage	Silver or Tin Coated Copper Wire	Nickel Coated Copper Wire
#22	12	8
#24	8	6
#26	5	3
#28	3	2
#30	1.5	1.5

Material and Finish
Beryllium copper alloy per ASTM B196 or B197, 50 microinches gold plated per ASTM B488 Type 3 Code C Class 1,27 over nickel plate per QQ-N-290 Class 2, 50-100 microinches.
Thermocouple contacts: alumel or chromel alloy, unplated, per ANSI 96.1
Socket contact hood: stainless steel, passivated per AMS-QQ-P-35.

Specifications
Current Rating: 5 Amps maximum
Voltage Drop (at 5 Amps and 25° C): 70 millivolts maximum
Temperature Range: -65° to + 200° C
Socket Contact Minimum Separation Force: 0.5 ounces

Crimp Tools and Insertion/Extraction Tools
Crimper: 809-015 or AFM8
Positioner: 809-005 (std). Use P/N 809-057 for small bore contacts 809-065 and 809-066
Standard Insertion/Extraction Tool: 809-088

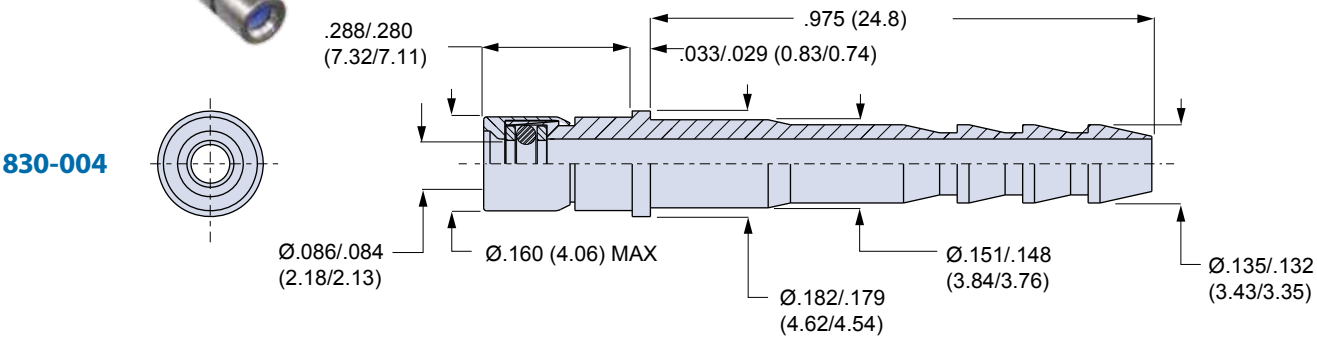
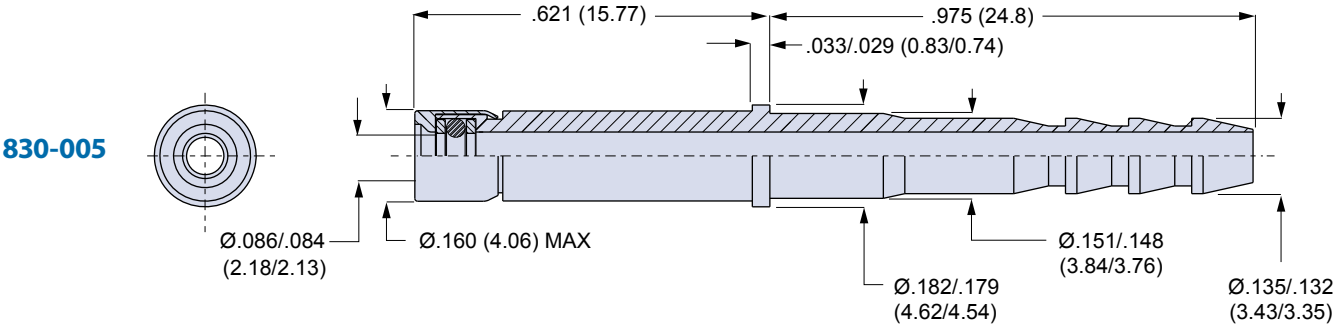
830-004 and 830-005
Size #12 Pneumatic Socket Contacts

Size #12 Pneumatic Contacts

Contact Type	For Use With	Tube I.D.	Part Number
Socket	D38999 Series II, Series 79 and Series 80	.094 (2.38)	830-004
Socket	D38999 Series I, III, IV	.094 (2.38)	830-005

830-004 supercedes 857-010





Stainless steel pneumatic contacts attach to 3/32 inch (2.38) diameter tubing. Socket contact has o-ring and PTFE backup washers. Contacts snap into size #12 connector cavities. These pneumatic contacts are rated for 100 PSI maximum air pressure. No installation tool is required. Remove contacts with plastic extraction tool 809-132.

Material and Finish

Body and Cap: stainless steel, passivated
O-ring: fluorosilicone
Washers: PTFE

Specifications

Contact may be used for air pressures up to 100±10% PSIG
Fits #12 socket contact cavities (see description for details)

Notes

High pressure pneumatic contacts available. Consult factory for more information.

Material and Finish

Contact Body: Tellurium copper alloy with gold, silver or tin plate (see part number development)

Notes

Wire must be crimped or soldered to adapter prior to crimping or soldering electrical contact to adapter. For dimensional data, please consult factory.

Outside diameter may exceed contact crimp-pot diameter, and is therefore not recommended for use in rear release contact style connectors.

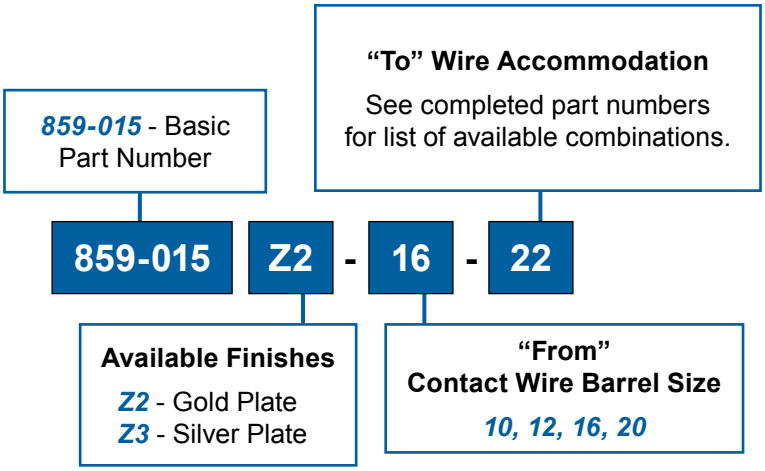
859-015
Wire Barrel Reducer Bushing
For Use with Crimp Contacts

Wire Barrel Reducer Bushing



Material and Finish
Copper alloy with gold or silver plate (see part number development)

Notes
Bushings are designed to reduce the barrel size of crimp contacts to accomodate smaller wire gages than specified in M39029.

Bushing must be pressed into contact by hand before crimping.

For proper environmental sealing against the rear connector grommet, use of shrink sleeve or potting may be required.

SERIES 77

FULL NELSON

Heat Shrink Boots

Outstanding Environmental and Mechanical Protection

"Think he'll ever break that hold?
Nope. He's got him in a Full Nelson!"

Nothing conjures up the image of an unbreakable hold like a Standing Full Nelson. Properly applied, this classic Greco-Roman wrestling move is simply unbeatable. We'd like to think the same holds true for our Series 77 *Full Nelson* Environmental Shrink Boots. Properly applied, Series 77 boots provide a dependable, leak-proof seal for interconnect cable assemblies. Optional adhesive coatings on the inside of the boot provide a watertight, high-strength bond to the cable jacket and the connector or adapter. And the Glenair shape-memory boot material formula works every time. So if you're worried about sealing effectiveness, if you want long-lasting environmental protection, if you want an ingress prevention solution that won't lose it's grip after years and years of service, get a Series 77 *Full Nelson*—the environmental shrink boot with the iron grip of a championship wrestler.

Tools and Accessories

Crimp Tools, Positioners, Insertion and Extraction Tools and More

Outstanding Product Availability

Many of the contacts in this book utilize crimping technology to effect contact to wire termination. The non-mating end of a crimp contact (the wire barrel) is a hollow cylinder into which a stripped wire (conductor) is inserted. The sidewalls of the wire barrel are then mechanically compressed (uniformly deformed) using a crimping tool to captivate the stripped wire.

The crimped wire to contact termination can then be manually, or with the assistance of a hand-held tool, clipped into place in the connector. The physical compression (deformation) of a contact barrel around a conductor in order to make an electrical connection must be accomplished in a proscribed and precise manner using the exact tools and accessories to achieve the desired gas tight crimp. This section of the book presents an organized inventory for all the tools and accessories necessary, including contact insertion and extraction tools, for the reliable termination and use of SAE-AS39029 and other industry standard crimp type contacts.

- Industry Standard Crimp Tools and Accessories
- One-Stop-Tool-Shopping for All Glenair Contact Types and Sizes
- Outstanding Technical Support and Assembly Procedures
- Same-Day Availability on Most Popular Tools and Accessories

Miniature Adjustable Crimp Tools

These crimp tools perform precision eight indent crimps for gas tight wire terminations and excellent tensile strength. Adjustment wheel has 8 settings. Ratchet mechanism prevents improper crimps. Use with bayonet type positioners. Check calibration with M22520/3 gages. Length is 6.75 inches, weight is approx. 10 oz.

A Standard M22520/2-01 crimper. Use with standard #23, #22D and #20HD contacts, and with M39029/76 and /78 coaxial center contacts. Requires positioner, ordered separately.

B Special MH992 crimper used with 50 ohm matched impedance coaxial inner contacts. Requires positioner, ordered separately.

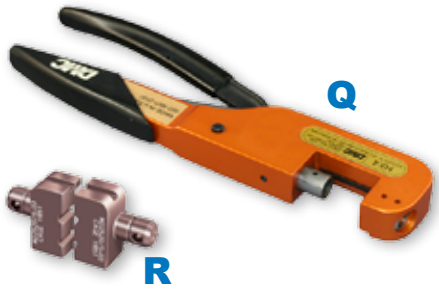
Parallel Action Crimp Tool and Hex Die Set for 50 Ohm Matched Impedance #12 Coax



Q Parallel action tool for use with hex crimp dies. 11 inches OAL, 2.0 pounds. Anodized aluminum frame, steel mechanism, plastic handles. Includes tool for die set extraction. Accepts all M22520/5 die sets.

R Die set for terminating coaxial shield to outer contact. Use with size #12 matched impedance M39029/102 and 103 type coaxial contacts. Set consists of upper and lower halves. Made of hardened steel with black oxide finish. Die set has two closures.

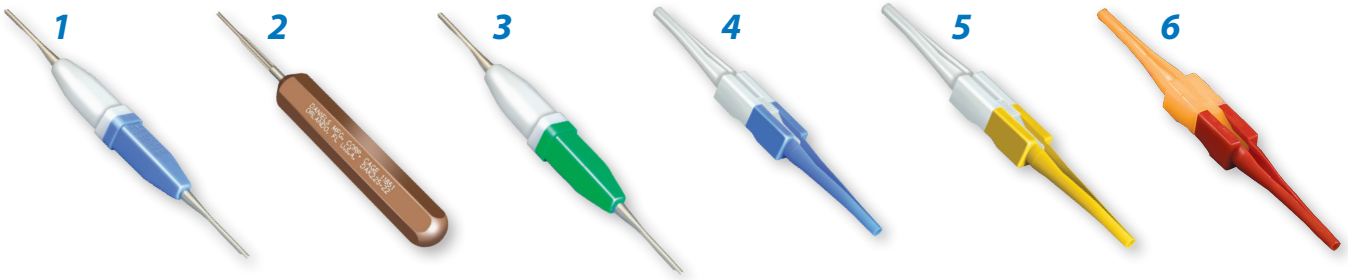
Contact Tools
Contact Insertion and Extraction Tools
and Contact Retention Tester 809-107

Contact Insertion and Extraction Tools



1 Insertion/Extraction Tool for #23 Contacts. This tool features molded plastic grips and sturdy stainless steel tips. Blue/White molded handle.

2 Insertion Tool for #23 Contacts. This tool features anodized aluminum handle and stainless steel insertion tip.

3 Insertion/Extraction Tool for #20HD Contacts. This tool features molded plastic grips and sturdy stainless steel tips. Green/White molded handle.

4 Insertion/Extraction Tool for #16 Contacts. Use with size #16 coaxial or power contacts. Economical molded plastic. White extraction tip, blue insertion tip.

5 Insertion/Extraction Tool for #12 Contacts. Use with size #12 coaxial or power contacts. Molded plastic. White extraction tip, yellow insertion tip.

6 Insertion/Extraction Tool for #20 Contacts. Molded plastic. Orange extraction tip, red insertion tip.

Contact Retention Tester for Size #23 Contacts

Check for properly seated contacts with this spring-loaded tester. Apply the tool tip to the mating end of a contact. Push on the handle until the spring compresses to the recommended force. A visual indicator shows full compression. The contact is properly retained if it is not displaced.

The adjustable handle should be set to 3.2 pounds (14.2 N). The pin tip is used with #23 pin contacts. The socket tip is used with #23 socket contacts.

Order the complete kit, or order the tips and handle separately.

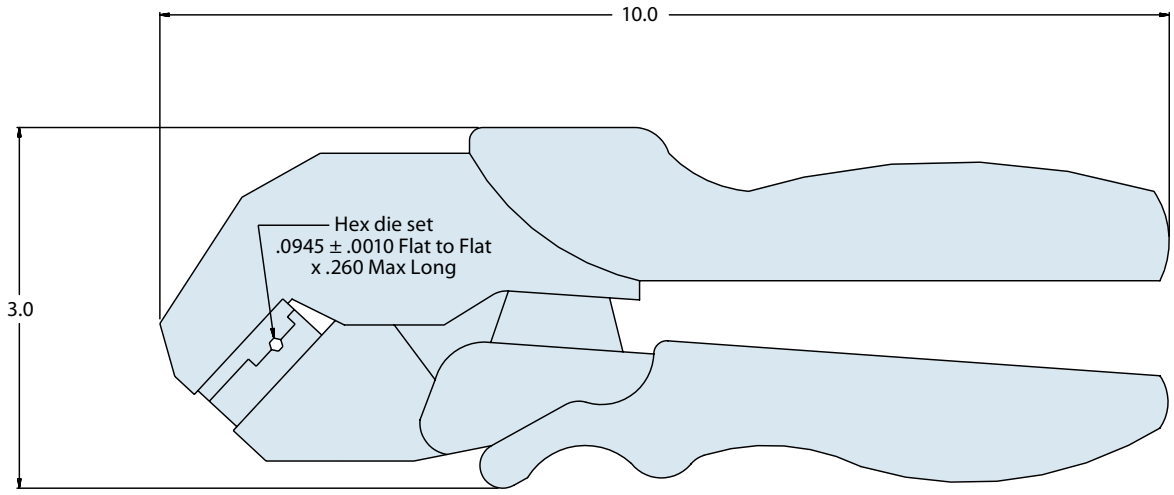
Fiber Optic Terminus Crimping Tool for M29504, GHD, GFOCA and NGCON

The Glenair fiber optic crimping tool enables users to quickly and effectively terminate the crimp sleeve to the cable strength member for a secure mechanical junction. The tool is compatible with many common termini styles, including M29504, Glenair High Density (GHD), GFOCA and NGCON.

Part Number	Compatible Termini	
182-012	181-039	M29504/14 Pin
	181-040	M29504/15 Socket
	181-011	#16 Socket
	181-012	#16 Pin
	181-047	Genderless GHD, Keyed
	181-056	Genderless GHD, Non-Keyed
	181-050	Genderless GFOCA
	181-043	Genderless NGCON



182-013
Straight Insertion Tool
For Fiber Optic Termini

Straight Insertion Tool for Fiber Optic Termini

The preferred tool of seasoned fiber optic technicians, the Glenair straight insertion tool is designed to aid users in populating connectors with fiber optic termini. Gone are the days of damaged fibers and sore fingers—this convenient tool features a comfortable handle and specially designed insertion tip for use with M29504, GHD and many other termini available from Glenair.

Part Number	Compatible Termini	
182-013	181-039	M29504/14 Pin
	181-040	M29504/15 Socket
	181-051	M29504/03 Dummy

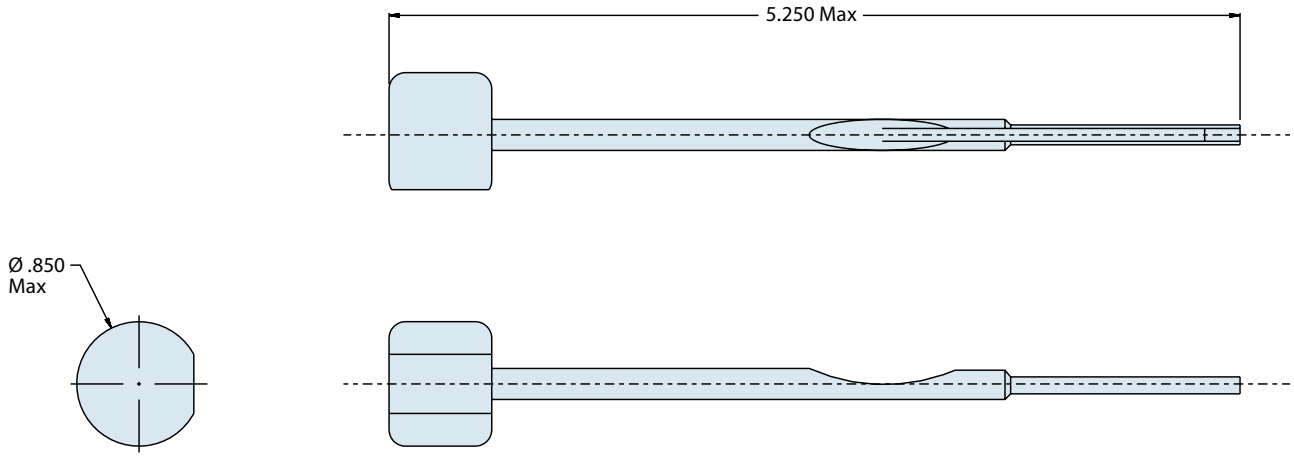
	181-022	#16 Pin
	181-056	Genderless GHD, Non-Keyed



Right Angle (90°) Insertion Tool for Fiber Optic Termini

The Glenair 90° terminus insertion tool is designed to help populate connectors with fiber termini in situations where space is limited—while offering users the same easy insertion as with our straight 182-013 tool. Ideal for use in boxes and on connectors with backshells that inhibit normal rear insertion. Designed for use with M29504, GHD and many other termini available from Glenair.

Part Number	Compatible Termini	
182-014	181-039	M29504/14 Pin
	181-040	M29504/15 Socket

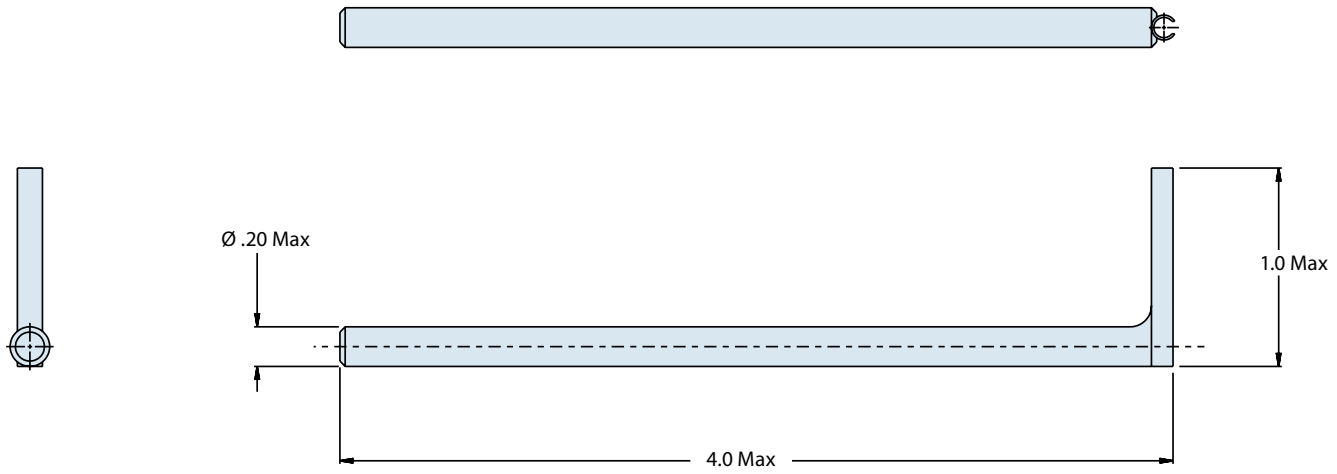
	181-012	#16 Pin

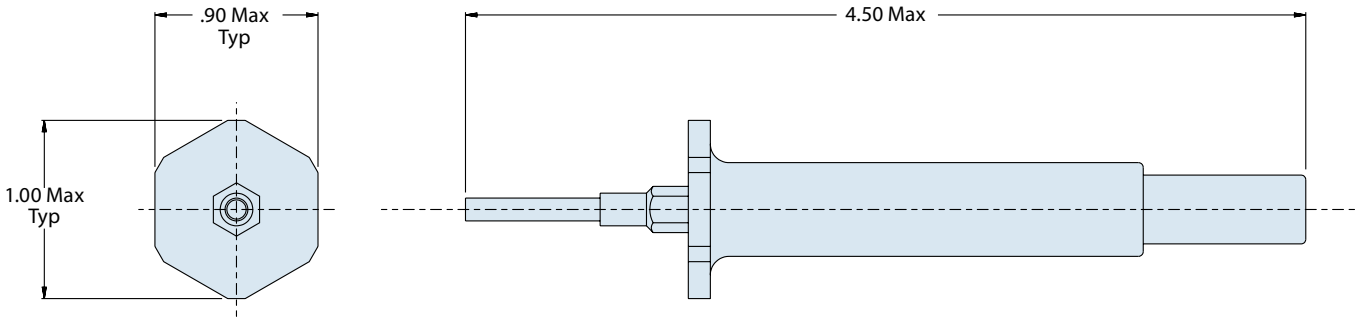


182-015
Extraction Tool
For Fiber Optic Termini

Extraction Tool for Fiber Optic Termini

The Glenair fiber optic terminus extraction tool is designed for use with front release/rear entry termini. Sliding the tool into the face of the insulator and depressing the plunger—after first removing the alignment sleeve with an 182-016 tool—enables users to quickly and easily remove the fiber terminus from the rear of the insert. Compatible with Glenair front release fiber optic termini.

Part Number	Compatible Termini	
182-015	181-039	M29504/14 Pin
	181-040	M29504/15 Socket
	181-051	M29504/03 Dummy
	181-011	#16 Socket
	181-012	#16 Pin



Alignment Sleeve Insertion/Extraction Tool for Fiber Optic Termini

The Glenair alignment sleeve extraction tool utilizes a special claw to extract alignment sleeves from the face of front-release fiber optic inserts. Users are afforded easy serviceability of front release termini by sliding the tool's tip into the front of the insert, depressing the plunger, allowing the claws to purchase on the alignment sleeve, then gently pulling away from the face of the connector. Used in conjunction with 182-015 terminus extraction tool.

Part Number	Compatible Termini	
182-016	181-040	M29504/15 Socket
	181-011	#16 Socket

Chapter C: Fiber Optic Termini
Part Number Index

Glenair Part Number	Part Description	Contact Size	Pin / Socket	Connector Series	Product Page
MIL-DTL-38999 Fiber Optic Contacts					
181-001	M29504/5 Socket Terminus	16	Socket	D38999 Series III	C-4
181-002	M29504/4 Pin Terminus	16	Pin	D38999 Series III	C-6
181-035	Socket, Large Core Fiber	16	Socket	D38999 Series III	C-8
181-036	Pin, Large Core Fiber	16	Pin	D38999 Series III	C-9
181-052	Jewel Pin Terminus	16	Pin	D38999 Series III	C-10
181-053	Jewel Socket Terminus	16	Socket	D38999 Series III	C-11
181-048	Sealing Plug	16	Pin	D38999 Series III	C-12
181-065	#20 Pin Terminus	20	Pin	D38999 Series III	C-13
181-066	#20 Socket Terminus	20	Socket	D38999 Series III	C-14
MIL-PRF-28876 Fiber Optic Contacts					
181-039	M29504/14 Pin Terminus	16	Pin	M28876	C-15
181-040	M29504/15 Socket Terminus	16	Socket	M28876	C-16
181-051	M29504/3 Dummy Terminus	16	Dummy	M28876	C-33
Series 80 Mighty Mouse Fiber Optic Contacts					
181-057	Mighty Mouse Pin Terminus	16	Pin	Series 80 Mighty Mouse	C-18
181-075	Mighty Mouse Socket Terminus	16	Socket	Series 80 Mighty Mouse	C-19
Special Fiber Optic COTS Contacts Size 16 Front Release					
181-011	Front Release Socket with Pressure Sealing O-Ring(s)	16	Socket	COTS	C-20
181-012	Front Release Pin	16	Pin	COTS	C-22
181-051	M29504/3 Dummy Terminus	16	Dummy	COTS	C-33
ARINC Type Fiber Optic Contacts					
181-076	ARINC 801 Terminus	16	Genderless Pin	ARINC 801	C-24
187-079	M29504/6 Pin Terminus	16	Pin	ARINC 404, 600	C-25
187-080	M29504/7 Socket Terminus	16	Socket	ARINC 404, 600	C-26
Glenair High Density (GHD) Fiber Optic Contacts					
181-056	GHD Terminus, Non-keyed	18	Genderless Pin	GHD	C-28
181-047	GHD Terminus, Keyed	18	Genderless Pin	GHD	C-30
181-058	Dummy Terminus	18	Dummy	GHD	C-32
Glenair GFOCA Fiber Optic Contacts					
181-050	GFOCA Terminus		Genderless Pin	GFOCA	C-34
181-059	Dummy Terminus		Dummy	GFOCA	C-36
Next Generation Fiber Optic (NGCON) Contacts					
181-043	M29504/18	16	Genderless Pin	M64266	C-37

Chapter D: Special Purpose Contacts
Part Number Index

Chapter E: Tools and Accessories
Part Number Index

Glenair Part Number	Military Part Number	Part Description	Product Page
		Miniature Adjustable Crimp Tools	
809-015	M22520/2-01	Standard miniature hand crimp tool	E-2
809-128	N/A	Special miniature hand crimp tool for use with 50ohm matched impedance contacts	
		Positioners For Use With M22520/2 Miniature Adjustable Crimp Tool	
809-005	N/A	Size #23 contacts for #22-#28 AWG wire	E-2
809-057	N/A	Small bore #23 for #26-#30 AWG wire	
809-125	M22520/2-35	M39029/76 and /78 coax inner contact	
809-124	N/A	Matched impedance #12 coax inner contact	
809-135	M22520/2-34	M39029/27 and /28 coax inner contact	
859-006	N/A	Matched impedance #12 coax inner contact. (Use with 809-128 crimp tool)	
809-206	N/A	#20HD contacts	
N/A	M22520/2-10	#20 contact, series I, II, III and IV	
N/A	M22520/2-09	#22D contact, series I, II, III and IV Pin	
N/A	M22520/2-07	#22D contact, series I, III and IV Socket	
N/A	M22520/2-06	#22D contact, series II Socket	
N/A	M22520/2-35	#16 contact, series I, II, III and IV	
N/A	M22520/2-34	#12 contact, series I, II, III and IV	
N/A	M22520/2-37	Quadrax Inner Contact	
		Crimp Tool And Positioner For #12, #16 And #20 Power Contacts	
809-136	M22520/1-01	Crimp tool for use with size #20, #16 and #12 power pins	E-3
809-137	M22520/1-04	Positioner for use with size #20, #12 and #16 Power contacts	
809-138	N/A	Positioner for use with 809-093 adapters	
		Crimp Tool And Positioner For #16 Coaxial Outer Contact	
809-127	M22520/4-01	Crimp tool for use with size #16 coaxial contacts.	E-3
809-126	M22520/4-02	Positioner for use with size #16 coaxial contacts	

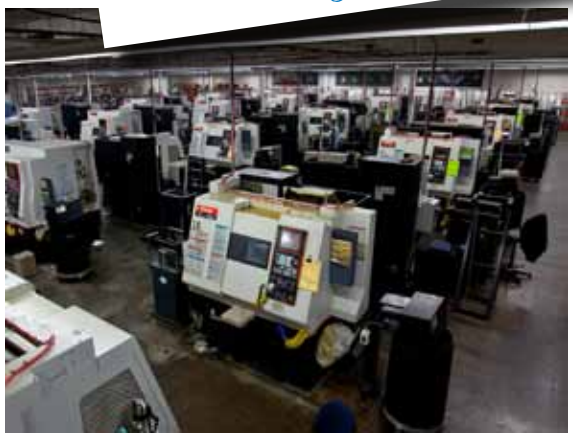
Glenair Part Number	Military Part Number	Part Description	Product Page
		Crimp Tool And Positioner For #12 Coaxial Outer Co Ntact	
809-133	M22520/31-01	Crimp tool for use with size #12 coaxial contacts.	E-3
809-134	M22520/31-02	Positioner for use with size #12 coaxial contacts	
		Parallel Action Crimp Tool And Hex Die Set For 50 Ohm Matched Impedance #12 Contacts	
809-129	M22520/5-01	Parallel action tool for use with hex crimp dies	E-3
809-130	M22520/5-03	Die set for terminating coaxial shield to outer contact	
		Contact Insertion and Extraction Tools	
809-088	N/A	#23 Insertion/Extraction	E-4
809-013	N/A	#23 Insertion Only	
809-203	N/A	#20HD Insertion/Extraction	
809-131	M81969/14-03	#16 Insertion/Extraction	
809-132	M81969/14-04	#12 Insertion/extraction	
809-207	M81969/14-10	#20 Insertion/extraction	
		Contact Retention Tester For #23 Contacts	
809-107-1	N/A	Tester Handle	E-4
809-107-2	N/A	Pin Tip	
809-107-3	N/A	Socket Tip	
809-107-4	N/A	Complete Kit	
		Fiber Optic Assembly Tools	
182-012	N/A	Fiber optic terminus crimping tool	E-5
182-013	N/A	Straight insertion tool for fiber optic termini	E-6
182-014	N/A	Right angle 90° insertion tool for fiber optic termini	E-7
182-015	N/A	Extraction tool for fiber optic termini	E-8
182-016	N/A	Alignment sleeve insertion/extraction tool for fiber optic termini	E-9

WHY CHOOSE GLENAIR?

Outstanding Customer Service!

Plenty of Raw Materials!

In-House Assembly!



Abundant Machining Capacity!

Huge "Same-Day" Inventory!
